"DEEP DOWN YOU WANT THE BEST"

We offer the best, at a price you can afford. A combination of the Scubapro MK2 Evo / R095 regulator set with its proven reliability and the durable T-One BCD.

The MK2 Evo is the latest model of this regulator with an unrivalled reputation in the Dive Industry for its ability to work in all conditions. The New Evo version is reduced in size and weight but has an increased air flow of 3,000 L/min. The T-One now features new materials and is setting new standards.

SCUBAPRO T-One BCD – 5th Gen

- Durable EndurTex high tenacity 820D colour lock nylon exterior
- Comfortable 420D nylon interior
- Reinforced shoulder pads
- Balanced Power Inflator
- Padded Cummerbund and Back Pack
- Colour coded tabs

FIRST STAGE

BREATHE EASY - UNEQUALLED PERFORMANCE WITH SCUBAPRO REGULATORS

SCUBAPRO FIRST STAGE REGULATORS

First stage regulators are divided into piston & diaphragm categories.

SCUBAPRO PISTON TECHNOLOGY

The general advantage of a piston first stage lies in its reliability & reduced maintenance requirements. More importantly, no other design can reach the high air delivery rate of a balanced piston controlled first stage. First stages with air-balanced pistons deliver significantly more air to the second stage than any other first stage. This technology is featured in our MK25 EVO first stages.

Classic downstream piston - The classic downstream valve is the first choice of diving centers & rental facilities worldwide for warm & moderate water temperatures. This technology is featured in our MK2 EVO first stage.

FIRST STAGE

SECOND STAGE

• SCUBAPRO DIAPHRAGM TECHNOLOGY

Diaphragm-based first stages are environmentally sealed so water cannot enter the inner mechanism. Diaphragm first stages have been the favored choice of cold water divers & those working in contaminated or muddy water. This technology is featured in our MK19 EVO, MK17 EVO 2 & MK11 EVO first stages.

• SCUBAPRO SECOND STAGE REGULATORS

A high quality second stage can significantly reduce stress & enhance diver safety by providing a smooth, low-effort breathing response, resulting in ample yet controllable quantities of air.

• AIR-BALANCED VALVE TECHNOLOGY

The air-balanced valve technology of SCUBAPRO second stages features a balancing chamber in the second stage mechanism, slightly offsetting the force of the downstream air entering from the first stage. Air-balanced valve technology is featured in X-Series, S-Series & G-Series second stages. For best results, they should be teamed with balanced first stages like the MK25 EVO or MK17 EVO 2.

SECOND STAGE

96,925฿

First stage

- Titanium construction
- Cold water XTIS (Extended thermal insulating system)
- Improved cold water performance by 30% in waters down to 2°C

Second stage

- Rugged reinforced technopolymer case
- Titanium barrel
- New exhaust tee increases performance while directing bubbles out of the field of view
- Compact Hi-Flow mouthpiece, exclusive to the S620X Ti improved airflow & mouth comfort

MK25 EVO / S620Ti

First stage

- Air balanced flow-through piston in a chrome plated brass body
- Patented XTIS (Extended thermal Insulating system) thermally insulating the inner mechanism from the environment, improving cold-water resistance
- Two opposing high pressure ports
- Four high-flow and one axial super high-flow low pressure ports on a swivel turret
- External intermediate pressure adjustment

Second stage

- A rugged full titanium barrel that is anti-corrosion and lightweight
- Air balanced second stage valve
- A rugged reinforced techno polymer case and front cover with stainless steel frame
- A Large diaphragm inside a compact second stage casing
- Diver-adjustable inhalation effort knob
- Venturi-Initiated Vacuum Assist (VIVA) lever
- New design Compact Hi-Flow mouthpiece

NEW

HYDROS PRO 2 BCD

Building on the award-winning legacy of the original Hydros Pro BCD, the Hydros Pro 2 delivers next-level performance, comfort, and convenience. With a modular design, premium materials, and travel-ready features, the Hydros Pro 2 is built for ultimate performance in all dive conditions.

Product Details:

- Available in 5 sizes, XS to XL/2XL
- Compatible Accessories: Monorail Weight Pockets, Monorail Pocket Lid Sets, Multi-Mount Accessory Plates, Accessory Bungee Sets and Hydros Ninja Pocket (when paired with Multi-Mount Accessory Plates)

X21.762.x00
36,725฿

>>> NEW FEATURES

Monorail Weight System

Uses an intuitive slide-and-lock rail system for easy single-handed operation

Heavy-Duty, Quick-Dry Bladder

Enables the BCD to dry almost instantly

Ergo-Lite Back Plate

Provides a body-contoured shape, soft padding, and dual top/bottom handles for easy two-handed loading

Tri-Bungee Retraction System

Allows for a more streamlined and compact air-cell underwater

Super Cinch 2 Tank Band

Enables fast and easy tank switches

Monorail Weight Pockets

The Monorail Weight Pockets deliver easy, seamless integration with the Hydros Pro 2 BCD. Designed for intuitive, one-handed use, the Monorail Weight Pockets mount directly onto the BCD for a streamlined look and feel.

Choose from Two Sizes: Standard or Mini

Standard size holds up to 4.5kg per pocket. Mini size is designed for warm-water diving and holds up to 2.25kg per pocket.

- Includes 2 sternum link plates
- Available in 6 colors:

X05.080.101

Intuitive, reliable & bulletproof, SCUBAPRO has combined everything you love about the Galileo with everything you've dreamed of in a dive computer. It's everything you expect from SCUBAPRO in full colour

Easy to read, Easy to use, Easy to love

Spend less time reading manuals & more time enjoying the experience

Easy to manage

- Bluetooth compatible, the G2 easily syncs with your PC, Mac, Android or iOS
- Stores up to 1,000hrs of dive profiles
- Rechargeable battery lasts up to 50 dives

Make it your own

- Customize your screen, colours, orientation & even the attachments to make the G2 truly your own
- Customized menu listings give you the ability to use as much or as little of the technology as you want; with easy activation of freediving, trimix, CCR & side mount modes without downloading or upgrading
- The G2 is targeted to quickly become the favorite computer for all divers of all skill levels & goes wherever your passion for diving takes you
- Even your dive profile is one of a kind-based upon your real-time breathing rate, your skin temperature & your heart rate

DELTA PRO FINS

The Deep Blue Delta Pro Fin is a mono-material professional diving and snorkelling fin ideal for rental or everyday use.

- Quick Release Buckle – Allows the fins straps to be easily removed
- Vented Blade Design – Decreases the drag created in the up kick and enhances the thrust created in the down kick
- Pre-arched Blade – Results in more thrust per kick underwater
- Super Channel Technology – The soft pre-arched Thermoplastic Rubber material built within the blade scoops water throughout the kick, producing maximum thrust
- Colour coded fin straps assist dive centres and snorkeling operators to easily identify fin sizes
- Available in: Black/Blue, Black/Yellow, Black/Orange, Black/Black
- Sizes: XS-S, M, L-XL and XXL

ALUMINIUM TANK

Catalina SCUBA Cylinders – Quality You Can Rely On
For over 30 years Catalina has been manufacturing aluminum SCUBA cylinders and is a leading supplier in the Global market

Catalina SCUBA cylinders are:

- Manufactured in state-of-the-art facilities located in the USA
- Produced from high quality North American sourced raw materials.
- Inspected to DOT (IIA) standards - dimensional, visual, hydrostatic, tensile and burst testing
- Complete traceability of cylinder production batch, test reports and raw materials

Dive Supply is the exclusive distributor of Catalina SCUBA cylinders in Thailand.

Made in the USA.

The **POSEIDON EDITION** represents an excellent value-for-money range of compressors without compromising typical **BAUER** quality. This product range has been developed for uncomplicated operation, combining proven core components from **BAUER** with a simple but robust chassis.

PE100

- 100 l/min
- 225 / 330bar

The PE 100 is the smallest & lightest compressor unit of the PE range. With its three drive variants (petrol, three-phase & single-phase alternating current).

PE-TE 200-300

- 200 - 300 l/min
- 225 / 330bar

The PE 200 - 300-TE models offer the optimum weight / price ratio.

PE-TB 200-300

- 200 - 300 l/min
- 225 / 330bar

New ! The PE200-300-TB Petrol driven range offers compact powerful mobile cylinder filling. Available with optional carry handles.

JUNIOR II

Reliable, durable and extremely versatile, the Junior II has a fill rate of 100 l/min. A global classic with more than 100,000 units sold worldwide.

Now available with optional automatic condensate drain & final pressure switch off.

MARINER 200

With a Crash Frame and a charging rate of 200 l/min it is the most versatile compressor in the PROFI-LINE II range.

MARINER 250

A choice of either the P31 or P41 Triplex filter on this 250 l/min compressor.

MARINER 320

One of the most powerful portable compressors in the world with a charging rate of 320 l/min.

MINI-VERTICUS

Available with a charging rate of 150-320 l/min and with an open design as standard. Optional - Super Silent version, P61 Purification system, B-APP.

Fully automatic B-CONTROL MICRO compressor control with colour display.

B-DRAIN: New automatic condensate drain is quieter & saves energy.

Long unit service life: use of high-quality materials that have been optimised for continuous use.

- 225 & 330 Bar
- 150-320 l/min

Type Designation	Charging rate ¹		Max. operating Pressure (bar)	Speed (rpm)	Motor Output (kW)	Purification System	Weight net (kg)	Dimensions L x W x H (cm)

Compressors

91

VERTICUS

The VERTICUS series has been developed & built specifically to meet high performance requirements in continuous operation for professional applications.

Available with a charging rate of 450, 540 or 680 l/min. Open design as standard.

Optional - Super Silent version, P61 Purification system, B-APP.

B-DRAIN: New automatic condensate drain is quieter & saves energy.

Fully automatic compressor control: B-CONTROL with colour display.

Optional oil level monitoring system: For safely switching off the compressor unit when the oil level is low.

- 225 & 330 Bar
- 450 – 680 l/min

Type Designation	Charging rate ¹			No. of Compr. Stages	Speed (rpm)	Motor Output (kW)	Purification System	Weight net (kg)	Dimensions L x W x H (cm)
	l/min	m³/h	cfm						
V 450	450	25.2	15.9	4	1320	11	P61	402	120x79x153
V 540	540	32.4	19.1	4	1230	11	P61	402	120x79x153
V 680	680	40.8	24.0	4	1400	15	P61	416	120x79x153

The **POSEIDON EDITION** represents an excellent value-for-money range of compressors without compromising typical **BAUER** quality. This product range has been developed for uncomplicated operation, combining proven core components from **BAUER** with a simple but robust chassis.

PE-VE 300-850

- 300 - 850 l/min
- 225 / 330 / 420bar

The new generation VE range excels through its high delivery rates of up to 850 l/min. Open design as standard. Optional super silent housing.

PE-MVE 250-300

- 250 - 300 l/min
- 225 / 330bar

The PE-MVE comes as standard with Super Silent housing, automatic condensate drain system & the user friendly BHW-CONTROL control unit.

PE-HE 200-300

- 200 - 300 l/min
- 225 / 330bar

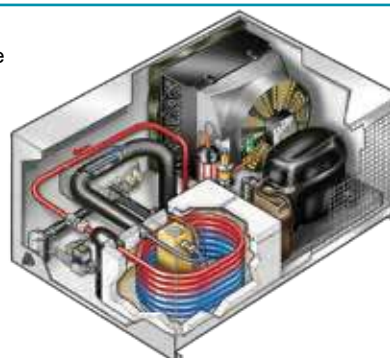

The PE 200 - 300-HE the standard version comes already equipped with automatic condensate drain & easy-to-use control. Ideal for use on dive boats.

B-KOOL PURIFICATION

The B-KOOL refrigeration dryer from BAUER considerably reduces the running costs of the compressor whilst protecting the environment at the same time.

At locations with particularly high ambient temperatures, B-KOOL assures a remarkably longer life time of the filter cartridge. You will benefit from a lower cost of purchase & storage of filter cartridges, a longer uninterrupted compressor operation & a lower consumption of filter cartridges.

- 200 - 680 l/min
- 100 - 350bar
- Up to 11 times longer life for your filter cartridges!
- Environmentally sound
- Integrated or as stand-alone version
- Easy to retrofit

BAUER PUREAIR CERTIFICATION

"PureAir – Safe Diving": High quality breathing air is the most important element of your diving equipment. Insufficiently or even non-filtered air from the compressor may jeopardize the health & even the life of any sports diver. The **BAUER PureAir Campaign** offers any diver an easy to use guide for selecting trustworthy filling stations. By choosing to use **BAUER** state-of-the-art technology diving centers are able to meet the highest standards of Air Quality & are recognized with the award of the **BAUER Pure Air Seal**.

The exclusive **BAUER PureAir Seal** guarantees any diver that he or she really receives only the purest breathing air. Learn more at www.bauerpureair.com/diving

To find out how to get your **BAUER PureAir Certification** please contact our Sales & Service team.
